Forecast for Monday 15 Nov 2021

Weather: A few clear spells through the early hours, with some low level mist and fog in the east which should clear before dawn as cloud increases. Then a mostly cloudy day with patchy light rain and drizzle, mainly affecting western hills, with the best of any brighter spells in the north and east.

Chance of cloud free mountain/hill tops above 600m: Little chance through much of the day across the south and west but nearer 40% at times across northern and eastern hills.

Visibility: Periods or persistent cloud above 300-450m, and perhaps lower in south later, although more occasional above 450-600m at times in the north and east. Otherwise visibility good or rather hazy, but less than a kilometre in early low level mist and fog, falling to just a few kilometres in drizzle.
